

420 HUNTER M1H

supporting your precision

420 HUNTER M1H

The ZCO M1H hunting reticle is a Mil based reticle purpose-built for fast, confident target acquisition in real-world hunting conditions. Heavier primary stadia naturally draws the eye to the center dot, allowing the user to pick up game quickly and instinctively. Precise 1, .5, and .2 mil hash marks remain clearly visible in low-light environments, delivering dependable reference points at dawn, dusk, or in shaded timber. The clean uncluttered layout ensures that the reticle stays crisp and usable across the entire magnification range. Designed to perform in dense vegetation and complex backgrounds, the M1H reticle is the perfect balance of speed, precision, and clarity.
